Spring 2016 ~ The University of Florida

COURSE NUMBER, TIME & PLACE

REL 3938: Wednesdays, 5:10-8:10; CSE121; an option for viewing assigned films after the scheduled end of the class will be available.

INSTRUCTOR

Professor Bron Taylor (Ph.D.)

Email: bron@ufl.edu

Office: Anderson 121

Office hours: Wednesdays 3:15-4:30 p.m. (Due to my lecture schedule, appointments must be made by the end of the previous day to ensure I am free to meet with you and do not waste your time..)

COURSE DESCRIPTION

Focusing on the period since Walt Disney began making animal-focused documentaries and animated films in the 1930s, up through the blockbuster motion picture *Avatar* (2009), this course examines religious, spiritual, and political dimensions of artistic productions, scientific representations in museums, and other cultural inventions (such as theme parks), in which nature takes center stage. We will explore the cultural tributaries, influences, and controversies such productions engender, for they constitute important ways that environmental ethics, and quests for environmentally sustainable livelihoods and lifeways, are expressed and promoted. The course will enhance students' abilities to interpret these cultural productions and their evocative power and explore their own reactions to these social phenomena.

Purpose and Objectives

- 1) complicate and thus make more critical and sophisticated what students understand by terms like religion, spirituality, nature, and popular culture.
- 2) provide students with an understanding of different ways to study beliefs, perceptions, and practices related to what people variously construe as religion or spirituality.
- 3) illuminate the ways in which religion, spirituality and nature-related values are constructed, expressed, and contested in popular culture.
- 4) facilitate the development of students' own critical and ethical engagements related to their understandings of the world and their place in it.

Course Outline

The course will unfold in three main endeavors: (1) understanding worldviews (2) developing analytic frameworks, and (3) analyzing social phenomena at the intersection of religion, spirituality, nature, and popular culture. Specifically:

REQUIREMENTS

Movies and Documentaries

Students will view motion pictures both in class and outside of class. Many of those that are scheduled to be viewed outside of class (or partly inside and partly outside of class) I will also

begin during class or make available immediately after the scheduled class period, in our assigned or another room. Students may opt to see these films using streaming or other methods. *Students must see required films no later than they assigned.*

Discussion and Participation

Nearly every week students will respond to questions sent by the professor via email. Answers will be brief and will address the week's readings and/or films. Cumulatively, this is worth 10% of the course grade. Each week's responses must be sent before class on Wednesday. No exceptions. The points for this part of the class will be awarded at the end of the class.

Exams

There will be a midterm and a final exam, worth 30 and 40% respectively, which will be taken in-class, with diverse questions to respond to, including essays sections. The exams will be comprehensive, with questions drawing on any classroom experience or assignment that occurred previously.

Research Paper and optional Slideshow Presentation

Students will prepare a 2,000-2,500-word research paper that adheres to the University of Florida's Level-Two Writing Requirement. The essay will comprise 20% of the course grade. In addition to this essay, students may submit a related slideshow illuminating the social phenomena analyzed in the written paper. Excellent slideshows will receive bonus points and outstanding ones (with student permission) may be added to the course syllabus as examples and resources for future classes. Slideshows will be prepared with powerpoint, keynote, or other slideshow presentation programs.

In your paper you will focus on one or more aspects of popular culture, examining the ways in which it (or they) seek to evoke or reinforce spiritual perceptions and beliefs related to the environments that we inhabit. (These environments can be either what we normally consider to be natural and pristine or dramatically modified by our species.)

Use the theoretical lenses presented in the class to make *an argument* about the social phenomenon under investigation, or draw on other analytic perspectives you have learned elsewhere, or develop your own analytic approach as you make your argument. Build your argument on evidence you bring forward and consider carefully views and evidence contrary to your own perspective (if any such is extant); done well, considering competing points of view will make our argument stronger.

The best papers will often include a library search for scholarly articles or books that illuminate your subject matter but this is not absolutely necessary. Some things you may wish to focus upon nobody has analyzed with the kind of focus we are taking in this class. You may, therefore,

be plunging into a completely novel area, using lenses learned in or beyond this class as heuristic (interpretive) devices.

Consider what the artists themselves are trying to argue, convince you of, evoke in you, and call you to action regarding. Alternatively, you may elect to focus on the audiences who experience these productions. Consider also whether the social phenomena in question are advancing not only a spiritual approach to nature but also a political ideology, namely, ideas, aims and assertions that constitute a socio-economic-political program. Doing so will also bring into focus the perspectives with which your subject matter is in contention. Good questions to ask include: What do the producers of what you are examining think is at stake? With whom are they in contention? Can their means of artistic expression be considered ‘technologies of the sacred’ and if so, how? If there is a view of where humanity went wrong spiritually and with regard to nature, what is it? And if they are explicitly or implicitly envisioning or advocating a certain kind of future (e.g., a utopian or ‘ecotopian hope), what would it be?

To decide on a research project it would be a good idea to carefully review the entire class schedule to see what is coming up, as well as the “Additional Resources” section at the end of this syllabus.

Hints: In some cases the theoretical approach and arguments found in *Dark Green Religion* will be helpful as you work up your own paper. Do these arguments and the evidence mustered for them compelling? Does your own focus evidence such arguments? Or, does your research cast into question those findings? Alternatively or additionally, *Avatar and Nature Spirituality* might be helpful to you analytically because it exemplifies the sorts of analyses I am looking for in your own papers. You may, therefore, find it helpful to read ahead to find the range of issues it explores that may also be ripe for analysis in your own research.

You are by no means restricted to the many possibilities to be found in the syllabus but being familiar with it may trigger ideas about things you know about that would be fitting. I especially like learning about things I had no idea even existed!

Finally, do not assume that you must focus on social phenomena in popular culture that promotes environmental concern and action. Much of popular culture is indifferent to and a distraction from any environmentalist agenda, and some is in direct opposition to such an agenda, including due to religious, political, and moral beliefs that view environmentalist worldviews as religiously, politically, and ethically misguided or even dangerous.

The more innovative and creative your research paper is, the better argued and evidenced, the better your grade for it will be; the same applies to your slide show presentation if you elect to do one to complement your research paper. If your paper is exceptional, I may encourage you to develop it further in order to submit to a scholarly journal, including the *Journal for the Study of Religion, Nature and Culture*, which I edit.

University Writing Requirement

The University Writing Requirement is designed to promote student fluency in writing. To receive writing credit students must receive a grade of C or higher and satisfactorily complete the writing component of the course.

Instructors will assess student's written assignments with respect to grammar, punctuation, usage of standard written English, clarity, coherence, and organization, according to the specifications of UF's writing assessment rubric (information about this is available online). Students will receive a coaching on improving their writing, corrections when needed, and a grade for their work. Students are encouraged to review Professor Taylor's [writing well guide](#).

Extra credit

Students are encouraged to submit additional resources that illuminate course themes, books, motion pictures, comic books, photographs, music, youtube and other online films, with short descriptions of their relevance. Those making contributions to this course or future syllabi for it will receive extra credit points, according to their significance.

EVALUATION

Points Possible for Required Assignments

Assignment	Proportion of Course Grade
Discussion/Participation	10%
Research Paper	20%
Midterm	30%
Final	40%

Calculating Grades

At the end of the semester, the total number of points earned by each student will be divided by the total number earned by the highest-scoring student. The resulting percentage will be used to calculate each student's grade for the course. Put in a formula, it looks like this:

the score of each individual student (your score)
(divided by) the highest score earned by a student

The percentage arrived at by means of this formula will be evaluated according to the following scale:

A	≥95
A-	90
B+	87
B	83
B-	80
C+	77
C	73
C-	70
D+	67
D	63
D-	60
F	≤59.99

This kind of scoring is fairer than many other forms of grading because: (1) It is based on what students actually achieve rather than some preconceived standard held by the professor; (2) Each student can receive a high grade; (3) Hard-working students will not be penalized for staying in a demanding course full of equally industrious students. With a traditional curve, demanding courses that “weed out” less industrious students, leaving hard-working ones, can unintentionally harm good students putting them in competition with each other. This will not occur in this course. To further insure fairness, any extra credit points will be added to the individual student’s score, *only after the highest score earned by a student has been established*. This ensures that the extra credit earned will not increase the difficulty of the grading scale. *I reserve the right to lower or raise course grades based on classroom contributions or upon absences. I also reserve the right to change course requirements.*

Late or Missing Assignments

Students who do not make discussion posts on time will not receive credit for them. Students who cannot take an exam on time for medical reasons, or deaths in their families, must inform the course instructors before the exam of the reason for their impending absence and provide evidence verifying the reason. No accommodation will be made after the fact apart from a contemporaneous accident immediately prior to the exam.

Academic Dishonesty. Students engaged in any form of academic dishonesty, as defined under the “Academic Misconduct” section of the Student Discipline Code, will be subject to other disciplinary measures. Students are expected to know what constitutes plagiarism and to understand and avoid inadvertent forms of it that can occur by cutting and pasting quotations from various texts on the world wide web and elsewhere.

Common Courtesy and Laptops: Cell phones of all sorts must be turned off during class. With the permission of the instructor laptop computers may be used during lectures but not when motion pictures are being presented, so be prepared to take written notes during such times. Students may not check email or surf the web during the class and if this is noticed, will be asked for their names and may be penalized for doing so. Students are not to engage in disruptive behavior such as whispering during the class.

Accommodation for Disabilities: Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation.

Reviewing exams. Academic dishonesty is so pronounced that faculty need to take precautions to ensure the integrity of exam processes. For this reason, in some classes, exams or parts of them will not be returned, but students may review them during office hours. At the end of the semester, work that was available for student pickup will be available in the Religion Department office in Anderson 107 for 30 days after the official date that grades are posted by the registrar. After this time, they will be recycled.

Presentations

Lecture on Civil and Terrapolitan Earth Religion

Documentary:

- The National Parks (2009), excerpts.

Some things to remember when viewing the National Parks excerpts:

These things are dealt with in parts of the 12 hour series that are not included in the excerpts:

- 1) Their establishment, in most cases, depended upon the violent subjugation and displacement of the indigenous populations already living there.
- 2) Their establishment would not have happened, or at least to the extent and within the specific time frames, were it not for both commercial interests (railroads and tourism, for example) and nationalism, including its ideology of 'manifest destiny.'
- 3) The Parks also include historical and cultural sites, and examples in many places in America including Florida.
- 4) Episode 2 has more historical information about John Muir's battle against the Hetch Hetchy dam in Yosemite National Park. Before the 1906 earthquake in California, which led to most of San Francisco being burnt to the ground, it looked as though he would win that battle, but afterward, the public switched to supporting it, being misled into believing that the water from it was needed to safeguard the city. Brokenhearted, Muir died soon afterward. But historians say for the most part his loss solidified the notion that National Parks should be off limits to commercial incursions.
- 5) Wallace Stegner is one of the countries greatest western writers. He is often quoted in the documentary but the excerpts shown do not introduce him.
- 6) Many of the cultural sites promote and reinforce patriotism and civil religion, which are in turn often linked to the exceptional natural landscapes and used to foster both we feeling and place feeling, and sometimes even superiority, over other people and places. Is a 'civil earth religion,' or a 'terrapolitan earth religion' expressed and promoted in the parks, or a narrower nationalistic civil religion, or neither?
- 7) Notice how different the reactions of people are to nature, that these reactions are to at least some extent 'socially constructed', namely, a reflection of the preexisting cognitive and cultural frames people bring to the experience. This was seen in the history chapter in the Dark Green Religion book; What examples of it to you see in this film?
- 8) Notice how different the reactions of people are to nature, that these reactions are to at least some extent 'socially constructed', namely, a reflection of the preexisting cognitive and cultural frames people bring to the experience. This was seen in the history chapter in the Dark Green Religion book; What examples of it to you see in this film? E.g., some people were and are horrified and by wild, sometimes geothermal nature, others find the sublime in the continent's wild places, others find evidence for the grandeur and goodness of God.
- 9) In a section not excerpted, the National Park Ranger Sheldon Jacobs discussed how he had no connections with wild places growing up in Detroit, but was immediately moved and captured by them on his first visit to Yellowstone National Park. At the time of the filming he was an interpretive ranger in Yosemite National Park. A good question when considering his mystical experiences with the Bison in Yellowstone is whether for him, that was a socially constructed experience, or a more personal one grounded in an experience, and a felt relationship, with the beings and place where Bison still are allowed to live.
- 10) Are there examples of animistic or Gaian spiritualities depicted in, and even expressed by the filmmakers, in this documentary? If so, where/when?

- 11) What role did photographers and landscape painters play in expressing and promoting nature spirituality and the establishment and protection of National Parks?
